

SF - 540

Semi-auto Laminator

Product Introduction

Introducing SF-540 Laminator Foiling: Elevating standard print projects to 'extraordinary' heights. The SF-540 has been engineered to address specific print finishing needs and constructed to the highest technical standards – featuring fully adjustable pressure and heat settings, designed to provide optimal results with today's digital print outputs.

SF- 540

Main Feature

- Semi-auto feeding with overlap feature
- Pneumatic auto separation
- The anti-curl bar allows thin film laminates to be flat
- Mirror chrome heating roller
- Thermal or Cold laminating
- Touch screen display system
- Digital foiling
- 2 rolls film installation
- Adjustable electric hydraulic pressure system

Technical Parameters

Model	SF-540
Max laminate width	540mm
Laminate paper	157-350gsm
Max speed	15 meters/min
Control system	Hydraulic
Max temperature	140 degree
Heating mode	Oil heating
Upper roll	High gloss chromium plating 160mm
Down roll	Silicon rubber 100mm
Display	Touch screen
Motor	AC motor
Input power	4000W
Paper overlap accuracy	1.5mm
Power	220V - 240V, 50-60Hz
Core size	3 inch
Film thickness	17 - 42 mic
Package dimensions	720x910x1360mm
Net weight	240Kg
Gross weight	325Kg
